Congresswoman Doris Matsui Releases 10 Reasons Repealing the Health Care Law Will Hurt Americans

WASHINGTON, DC – Today, in anticipation of this week's House vote to repeal the health care law, Congresswoman Doris Matsui (CA-05), released the following reasons that repeal would harm Americans.

10 Reasons Repealing the Health Care Law Will Hurt Americans

Repealing the health care law will:

1. End coverage for millions of Americans – 32 million Americans will lose their health coverage if the health care law is repealed.¹
2. Eliminate millions of American jobs – An estimated 4 million jobs expected to be created over the next decade by the health care law will be drastically reduced if it is repealed.²
3. Add billions to the deficit – The nonpartisan Congressional Budget Office has reported that repeal of the health care law would increase the deficit by an estimated \$230 billion.³
4. Allow health insurance companies to rescind coverage – Insurance companies will once again be able to drop people when they get sick, exactly when they need their insurance most.⁴
5. Allow health insurance companies to deny coverage – Insurance companies will once again be able to deny

coverage to children with pre-existing conditions, pregnant women and breast cancer survivors.⁵

6. Increase costs for seniors and take away new benefits – Seniors will face an increase in their prescription drug costs and be deprived of the 50% discount on prescription drugs that the law will provide.⁶

7. Reduce health insurance options for young adults – Young people will not be able to stay on their parents's plans until age 26.⁷

8. Raise health care premiums – Health care premiums for Americans getting coverage through large employers will go up, and the lack of exchanges will mean less competition and higher prices.⁸

9. Harm the middle class and raise taxes – Tax breaks and premium assistance that helps millions of families and small businesses pay for coverage will be eliminated.⁹

10. Allow health insurance companies to impose devastating annual and lifetime caps – People who have chronic conditions or serious illnesses will once again have to worry about insurance companies only paying a limited amount of their medical bills.¹⁰
